22 x 1-4 Inf X See Opolchenie Rule

Opolchenie Rule. At the beginning of Turn 4 September 1914, the Russian player can place the 22 Opolchenie infantry brigades on the maps. One brigade is placed in every town or city hex. These brigades are not free to move or attack until released. If attacked before they are released, they defend normally and can freely move afterwards if they survive the attack. Starting with September turn 5, the Russian player can release four of these brigades in this and every subsequent turn. Once released, they can attack and move normally. Units released by enemy attack don't count towards the four per turn limit. The Opolchenie brigades are 1-4 Inf X 1, 2, 4, 7, 8, 14, 16, 17, 18, 19, 20, 21, 22, 24, 25, 26, 27, 40, 45, 47, 81, 84.

Any reinforcement marked * (divisions 101-127) requires the player to remove any two Opolchenie brigades to place the marked unit on map. If no Opolchenie brigades remain in play, two strength points must be expended

to place the marked unit in play. These strength points can be taken by reducing units in play or using RPL units.

These units listed below can be built by the Russian player under the following conditions. For every strength point removed from an existing unit currently in play, two divisions from the list below can be brought into play as reinforcements. Only one strength point can be removed from any single division. A division can't be eliminated by removal of the strength point. The two divisions selected must be of the same type as the division from where the strength point was removed (i.e. a strength point from a line division must be used to build two line divisions, a rifle strength point to build two rifle divisions, etc.). New units must be built in numeral order.

Line divisions 1-4 Inf XX: 151, 153, 154, 155, 156, 157, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 4TR

*Rifle divisions 1-4 Inf XX: 6Rfl, 7Rfl, 8Rfl.

Turkistan rifle divisions 1-4 Inf XX:

4 TR, 5 TR

These units listed below may be built by the Russian player under the following conditions. For every two

strength points removed from an existing unit currently in play, two divisions from the list below can be brought into play. The two strength points can be from two different divisions.

Siberian divisions 2-4 Inf XX: 15Sib, 16Sib, 17Sib, 18Sib, 19Sib, 20Sib, 21Sib, 22Sib.

Finnish divisions 2-4 Inf XX: 5Fin, 6Fin

*Grenadier divisions 2-4 Inf XX: 5Gren, 6Gren, 2CaGren

Unit types marked * have an odd number of divisions available to be built. 2 strength points will build all three rifle divisions. 3 strength points will build all three grenadier divisions (2 strength points for the first two divisions, a third strength point for the last division). Only a total of four (4) divisions can be built in one turn from these lists.
